

The Pest Defense for Healthy Schools offers expert curriculum on how to transition and run an IPM program at schools and child care facilities.

- 10 free online classes on school IPM each tailored to a different aspect of school IPM
- In person training on transitioning to and running a school IPM program
- Upon the completion of either the online or in person training the participant gets a certification

The Pest Defense was developed by experts on IPM such as school employees, universities, extension agents, researchers and non-profit organizations. It is the first-ever standardized, national, peer-reviewed, pilot-tested training and has been rigorously tested by schools to make sure it meets their needs.
